PROJECTS

Hyperlocal IoT Weather Monitoring System

Flutter, Dart, Python Flask, IoT, API integration

2025

- Developed a responsive weather application using HTML, CSS, JavaScript, and Weather API.
- Implemented real-time weather updates, location-based search, and 5-day forecast.
- Designed a user-friendly interface with dynamic data fetching and error handling.

Transparent Project Funding Platform

Blockchain, Ethereum, HTML, CSS, JS, Solidity

2025

- Developed a decentralized project funding platform using Ethereum blockchain technology.
- Enabled secure and transparent crowdfunding through smart contracts, eliminating intermediaries.
- Implemented project listing, contributor funding, and trustless transaction management.

EDUCATION

UNIVERSITY OF ENGINEERING AND MANAGEMENT

Bachelor of Computer Applications (BCA)

Current CGPA: [7.80]

JAIPUR, RAJASTHAN
07/2024 – Present
